

ANÁLIS TÁXIS NOVA YORK

TA L

CONTEXTO NEGÓCIO

- O serviço é baseado em motoristas independentes e vendedores que geram receita compartilhada por corrida.
- Alta densidade populacional e fluxo turístico tornam o mercado de táxis em NYC altamente competitivo e eficiente.
- A análise de dados ajuda a entender padrões de procura, comportamento de clientes e rentabilidade no negócio.
- Vendor foca em volume e distribuição; motoristas buscam rentabilidade e eficiência operacional.

NYC TAXI DATA ANALYSIS

TRANSFORMAÇÃO O DADOS BRUTOS

O projeto demonstra a transformação eficaz de dados brutos em informações acionáveis para suporte à decisão.

ESTRUTURA PROFISSIONAL DE BI

Análise estruturada com boas práticas de business intelligence, desde a preparação até à apresentação dos insights.

ESTUDO APLICADO REALISTA

Simulação de cenário empresarial real com múltiplos stakeholders para otimizar resultados com dados.

COMPETÊNCIAS TÉCNICAS E ANALÍTICAS

Projeto reflete habilidades em Power BI, pensamento crítico e comunicação orientada para negócios.

PREPARAÇÃO E MODELAÇÃO DOS DADOS

Limpeza e Análise Exploratória

Importação e análise exploratória dos dados para identificar inconsistências e garantir qualidade.

Criação de Colunas Derivadas

Novas colunas como hora de pickup e dia da semana foram criadas para análises temporais detalhadas.

Classificação e Transformação de Dados

Tipos de veículos classificados conforme passageiros, convertendo dados técnicos em categorias de negócio.

Modelação e Relacionamentos

Criação de relacionamentos entre tabelas seguindo modelo estrela para garantir cálculos corretos.

FOR RIDES?

WHICH SERVICE ZONES
GENERATE THE HIGHEST AVERAGE
CONGESTION SUBCHARGE

VENDOR
DASHBOARD

The Yellow Zone (Manhattan) carries by far the highest average congestion surcharge (\$2.37), confirming central Manhattan as the operational core — but also flagging fare transparency as a customer-experience priority there.

WHICH SERVICE ZONES
GENERATE THE HIGHEST NUMBER OF
TRIPS?

VENDOR
DASHBOARD

The Yellow Zone (Manhattan) and Boro Zone together account for ~98% of all trips (67% and 31%), confirming Manhattan as the operational core — anchor fleet supply there, while treating the low-volume, high-value airport segment as a targeted opportunity.

WHICH VENDOR
GENERATES THE HIGHEST TOTAL
REVENUE?

VENDOR
DASHBOARD

DVeriFone Inc is the top revenue vendor (~\$7.73M, 45%), but the 'Unknown Vendor' share (~\$3.62M, 21%) is a material data-governance gap that should be traced and resolved before revenue is treated as reliable.

EMPLOYEE DASHBOARD

D Prioritize working more hours on Mondays and Sundays to maximize productivity and earnings.

WHAT ARE THE TWO DAYS A WEEK WHEN THE AVERAGE INCOME PER TRIP IS THE

EMPLOYEE DASHBOARD

D Maximize earnings by completing more trips with a 5-seat vehicle, or by accepting longer trips with larger vehicles to increase tip income.

WHAT IS THE TYPE
OF VEHICLE WITH THE HIGHEST TIP PER
MILE

EMPLOYEE DASHBOARD

D Focus on Manhattan, as it has the highest number of pickups and offers the best opportunity to maximize the number of trips.

WHICH BOROUGH ZONES
RECORD THE HIGHEST NUMBER OF
PICKUPS?

EMPLOYEE DASHBOARD

Focus effort on peak earning periods: 15:00–17:00 for highest trip volume and revenue, and 20:00 for fewer trips but higher-value fares, allowing similar earnings with less activity.

WHICH HOURS OF THE DAY GENERATE THE MOST TRIPS AND REVENUE?

EMPLOYEE DASHBOARD

WHICH ZONES GENERATE THE HIGHEST AVERAGE INCOME PER TRIP?

EWR and Staten Island show the highest average income per trip, so prioritize pickups in these zones to maximize earnings.

`tip per mile = DIVIDE('TRIPDATA MAI-JUN 2020'[tip_per_mile],
2020'[trip_distance], 0)`

ABORDAGEM ORIENTADA POR DADOS

O projeto destaca a importância de usar dados para melhorar a gestão dos serviços de transporte.

PADRÕES DE PROCURA E RENTABILIDADE

Identificaram-se variações claras na procura e rentabilidade conforme o tipo de veículo, zona e horário.

ALINHAMENTO ENTRE VENDOR E EMPLOYEE

Decisões integradas entre vendor e employee beneficiam todas as partes envolvidas no serviço.

USO EFICAZ DO POWER BI

O Power BI facilitou a transformação de dados complexos em informação clara e prática.

OTIMIZAÇÃO DE MOTORISTAS

Alocar motoristas estrategicamente nos horários de pico para maximizar a eficiência e atender à demanda elevada.

DISPONIBILIDADE DE VEÍCULOS MAIORES

Aumentar veículos maiores nos fins de semana para suportar maior volume de passageiros e melhorar o serviço.

FOCO EM ZONAS DE ALTA DEMANDA

Concentrar esforços operacionais em áreas com alta procura para otimizar recursos e rentabilidade.

DECISÕES BASEADAS EM DADOS

Utilizar análises de dados para melhorar a eficiência, experiência do cliente e maximizar lucros sustentáveis.
